Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

It is to be added reference signs put into brackets as follows:
-line 2: compound substrate (82) including a machined substrate (126) and a replicated substrate (116). ...
-line 3: ... structured surface (100) is a cube corner element (132, 134) on a compound substrate (82).
-line 4: ... the structured surface (100)...
-line 10: ... of a machined substrate (126); ...
-line 12: substrate (116) of the machined substrate to form a compound substrate (82); ...

INTERNATIONAL SEARCH REPORT

International application No. PCT/US 00/23708

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This Inter	rnational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
	Claims Nos.: - because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: see FURTHER INFORMATION sheet PCT/ISA/210
	Claims Nos.: pecause they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This Inter	national Searching Authority found multiple inventions in this international application, as follows:
1 #	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. A	as only some of the required additional search fees were timely paid by the applicant, this International Search Report overs only those claims for which fees were paid, specifically claims Nos.:
4. N	lo required additional search fees were timely paid by the applicant. Consequently, this International Search Report is estricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark o	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

The present claims relate to a substrate , an article and a method of manufacturing defined in unduly broad and speculative terms covering a great number of technical fields. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found, however, for mainly retro reflective sheets and moulds for making them. The general reference in the description to two specific other technical fields in which the invention could be applied – namely mechanical fasteners and abrasive products— does not provide support for the broad claims, because there is no indication in the description as to how the invention could be carried out in such technical fields. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out for a retro reflective sheet, a mould for making it and a method of making such a sheet or such a mould.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
